

Content Triage — allsaintsconcord.org WordPress Export

Generated from `assets/wordpress-export/allsaintsepiscopalchurch.WordPress.2026-05-27.xml` (~3,347 items).

This document: triage every published page + the 631 posts. Each row gets a decision before the Squarespace rebuild starts.

Summary

- **Pages:** 82 (70 published, 9 draft, 3 private)
- **Posts (blog/announcements):** 631
- **Attachments (media library):** 2,462 — separately handled via download + re-upload to Squarespace
- **Custom plugin data:** dlssus_task/sheet/signup (~69 items, sign-up form data — will not migrate; SignUpGenius is the replacement)

Pages — page-by-page triage

Recommendations are starter suggestions. Edit the **Decision** column directly. The **Preserved-URL** column is critical for QR-code-referenced or print-referenced URLs.

Legend for Decision: `KEEP` (migrate as-is, preserve URL if marked) · `MIGRATE` (rebuild on Squarespace, new URL OK) · `MERGE` (fold content into another page) · `RETIRE` (do not migrate) · `?` (decision pending)

Posts (blog/announcements) — bulk decision

Total: 631 posts spanning multiple years.

Recommendation for bulk handling: the vast majority are time-bound announcements (Lenten studies, Holy Week schedules, sermon series, etc.) that lose value after their season. Suggested default: **RETIRE all but the last 12 months**, then triage the recent ones individually. Brian to confirm.

Posts by year:

Year	Count	Default suggestion
2026	23	Review individually — recent
2025	60	Review individually — recent
2024	63	Retire by default
2023	64	Retire by default
2022	76	Retire by default
2021	72	Retire by default
2020	82	Retire by default
2019	96	Retire by default
2018	44	Retire by default
2017	33	Retire by default
2016	18	Retire by default

(33 more recent posts not shown; see XML directly for full list.)

Process

1. **First pass (alone):** for each page, fill in the Decision column. Mark Preserved URL where physical material references it.
1. **Review with Brian:** confirm posts cutoff, confirm anything seasonal (Tour de Saints, stewardship campaigns) that should re-spin yearly vs migrate once.
1. **Implementation pass:** for each KEEP/MIGRATE/MERGE row, that becomes a Squarespace build task in BACKLOG.md. RETIRE rows become a redirect (404 OK or 301 to nearest equivalent).
1. **Cutover check:** the Preserved URL column drives the final exact-slug audit at DNS flip.
